

EVER ASKED YOURSELF WHAT YOU SHOULD USE IN THE LAST 3 WEEKS OF FLOWERING?

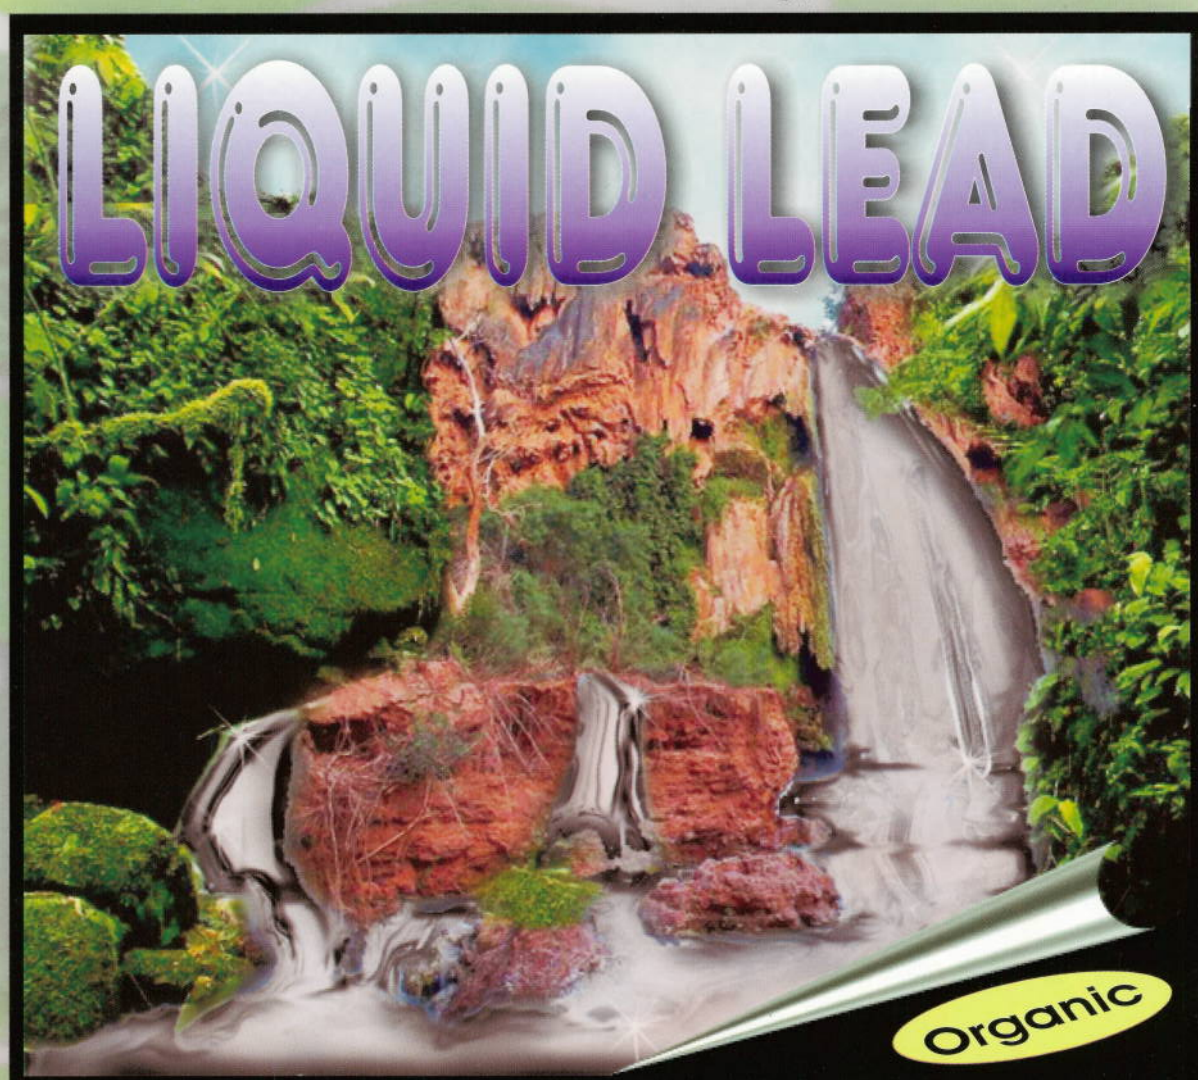

LIQUID LEAD

PRECISELY DESIGNED FOR THE HEAVIEST HARVEST.

A unique blend of Organic Enzyme Activators, Vitamins, essential Amino Acids and Carbohydrates that will unleash the full flowering potential of your favourite plants or herbs.

What LIQUID LEAD does:

Optimises harvest weight - Promotes vigorous growth - Enhances flavour & taste
Increases health of flowering plants

LIQUID LEAD uses naturally derived active ingredients including: Amino acids, Carbohydrates, Vitamins, Triacotinol, Enzymes & proven biological yield enhancers.

To get the most from your flowering plants, follow these simple instructions. Start using **LIQUID LEAD** 3 weeks prior to harvest. Add **2.5 mls** of **LIQUID LEAD** per litre of water, along with a quality flowering nutrient.

**HEALTHY PLANTS,
HEALTHY PROFITS**
